Motivation / Drive:

One of my greatest personalities is to become the best in anything I do, therefore I constantly seek for and persevere in opportunities that enable me to grow my technological skills to worlds standard and to update my skills with the newest technology. Coding skill for me is the number one on my to-do list.

EXPERIENCE:

- Frontend Engineer – Entobo Engineering -2024: entobo.com
 - Product design in accordance with Figma design.
 - implementation of effect and quality code
 - Api call (axios, tankstack-query, RTK-query)
 - Jira work management
 - slack communication
 - git

- Frontend Engineer – Goziri Insurance Brokerage-2023: goziri.com

As a Software Engineer at Goziri Insurance Brokerage, I collaborated with the team in the development of the UI and implementation of the functionality. I ensure adequate compliance with the culture of clean code, maintaining code integrity and obeying industrial standards.

- Frontend Intern – Coderden Cohort -2023:

Product was a gadget ecommerce website with stripe integrated payment method.

- ❖ Product design in accordance with Figma design.
- ❖ implementation of effect, clean and quality code (dry principle)

Technologies I have worked with:

- NextJs/ReactJs
- JavaScript
- TypeScript
- CSS
- Tailwind
- Next App Router
- Prisma
- Framer motion
- Context API
- NodeJs (crud)
- Context API
- Git- Git work flow
- Slack
- Jira
